### BALANCE OF POWER IN COPPER SELLING AGENCIES

When the Ray Consolidated company reaches its expected capacity of 100,000,000 pounds of copper annually, and the Chino reaches half of this amount or more, the product of both being contracted to the American Smelting and Refining company, the so-called Guggenheim interests will be the reckoning factor in the disposal of red metal.

The United Metals Selling company has heretofore been in the lead. The present comparative importance of these two main agencies is given as follows:

United Metals Selling Company.	
Electrolytic copper.....	288,000,000
Amalgamated mines.....	288,000,000
Utah Consolidated mines.....	10,000,000
Green-Canaan mines.....	40,000,000
Pennsylvania Salt Mfg. Company.....	6,000,000
	344,000,000
Pig copper—	
Arizona Copper mines.....	30,000,000
Tennessee Copper mines.....	12,000,000
	42,000,000
Lake copper—	
Standard brands.....	45,000,000
Aracelal brands.....	40,000,000
	85,000,000
Total.....	471,000,000
American Smelting & Refining Co.	
Electrolytic copper.....	90,000,000
Nevada mines.....	70,000,000
Cerro del Pasco mines.....	45,000,000
Tacoma Copper Co.....	25,000,000
Smelter products (inc. Mex.) and other plants.....	75,000,000
First National Copper Co.....	15,000,000
Ohio Copper Co.....	5,000,000
Total.....	325,000,000

**Continental Oil Company**  
(Incorporated)

terday, Mrs. J. H. Brennan, widow of the man who was murdered by Roy Armstrong more than two months ago, was located in Bingham, and said she would be on hand when the case is again called for preliminary hearing in the police court on November 1.

When the case was called Monday Mrs. Brennan could not be found, chiefly through the negligent tactics of the police. Tom Clark, one of the chief witnesses in the case, is in Salt Lake and will be on hand when the preliminary hearing is held.

It was learned by the sheriff's forces that Mrs. Brennan had been told that she would not be needed to appear in court for several months, and was not notified that the case was coming up for hearing this week.

The murder of Brennan occurred more than two months ago and yet not a single step has been taken toward a conviction. As a contrast to the police court methods here, lawyers point to the speedy trial and conviction of Dr. Hawley Crippen in London.

In that case the trial lasted only two days, so far as the evidence was concerned, and within a short time the jurors returned a verdict of guilty. The death sentence was pronounced and the murderer will hang on November 15.

### No More Dandruff

Badcon Sells the Remedy That is Guaranteed to Kill All Dandruff Germs.

Of course you and every intelligent reader of the Standard knows that dandruff is caused by a germ.

Dr. Sagerbund, the great French physician, proved this beyond a doubt.

In order to rid your scalp of filthy dandruff you must kill the germ. There is a hair dressing called Parisian Sage which is now sold in every town in America, that is guaranteed to eradicate dandruff, stop falling hair, splitting hair and scalp itch in two weeks, or money back.

If you have dandruff get a large 50 cent bottle today and rid yourself of it. Remember that if dandruff germs are not destroyed in time, the hair will surely fall out and baldness will follow.

Here's proof of what Parisian Sage has done; it will do more. It is the finest hair grower and hair dressing in the world, and people who use it regularly will never grow bald. Mrs. John Stoner, Evansville, Ind., writes on June 2, 1910:

"I used Parisian Sage and found it very successful; it removes dandruff and gives the hair life. I only used two bottles. I know it is a cure for dandruff."

Large bottles 50 cents at BADCON PHARMACY, and druggists everywhere. The girl with the Auburn hair is on every carton.

### SMALLPOX IN SALT LAKE CITY

Salt Lake, Oct. 26.—If there are any physicians who are afraid to take the responsibility for quarantining people they can easily shift it upon our shoulders and we are always ready and willing to assume it.

This statement was made yesterday afternoon by Dr. S. G. Paul, city health commissioner, in reference to smallpox discovered in the Grant school district, in which half a dozen cases, diagnosed as chickenpox, were found, upon examination to be smallpox.

While the situation is not such as to occasion alarm, it was of sufficient importance that all of the cases found thus far have been ordered in quarantine, and yesterday afternoon, under the direction of Dr. Paul, Drs. Sprague and Ashley, Clerk Foster, and Inspector Evans visited the Grant school, examined all of the pupils and ordered the school building thoroughly fumigated.

A week ago last Sunday, Dr. Paul was notified there was a case of smallpox at the home of J. D. Bowers, 522 South West Temple, where Mrs. Martha Pixton was ill with the disease. Upon investigation it was learned that several days previous a child of the family developed an eruption. A physician was called and he pronounced the case chickenpox. Later the father and mother contracted the disease, but no report was made to the health authorities until Mrs. Pixton, the grandmother, developed the malady. Then the physician notified Dr. Paul and it was learned that the disease was smallpox in a light form.

Following this case was that of Anna Johnson, daughter of Mr. and Mrs. J. L. Johnson, 228 West Fifth Street, and the case of Florence Avery No. 5 Rustic court. In the latter case the disease had run a course of ten days, the father, in the meantime, attending to his daily work. A child contracted the disease, but it was not pronounced smallpox until the mother became afflicted.

The next case was at the home of E. H. Eardley, 412 South First West. A child was taken ill with supposed chickenpox, which was found to be smallpox when the mother showed results of the exposure.

Other cases came to light at the home of Lizale and Archie Livingston, 263 West Fifth South street, both having smallpox. At this place there were four roomers. They became suspicious and left the place, and all efforts on the part of the health department to locate them have been futile. One more case was found at the home of Mrs. J. St. John, 644 South Second West street.

In all the cases, according to Dr. Paul, the children were kept out of school after the eruption was discovered. In only three cases were physicians called, and in each, pronounced the disease chickenpox and notified the health authorities only when adults contracted the disease, the doctor says.

Health Commissioner Paul declined to give the names of the physicians who were summoned.

"I would not charge them with ignorance or carelessness, and yet it is both," said Dr. Paul. "That is, a physician may be in doubt as to the nature of the disease and take a

chance, protecting the family from quarantine, while in doubt. Some of them don't like to shut up a family when they are not sure of their grounds, but at the same time they may be exposing hundreds of persons. That is why I say, if a physician is in doubt, he should notify us immediately. We will take the responsibility. We no doubt understand the symptoms of the disease better than does the average practitioner, because that is largely our business.

In the case where four roomers left the house, they would not now be, we know not where, had the case been reported promptly to us."

The inspectors who were at the Grant school yesterday afternoon made a thorough examination of each pupil, but found no further traces of smallpox. The building was thoroughly fumigated and Dr. Paul says there is no danger at this time from smallpox contagion from that school. Where the first case came from is purely a matter of conjecture.

The inspectors who were at the Grant school yesterday afternoon made a thorough examination of each pupil, but found no further traces of smallpox.

### AN ADVERTISEMENT

By D. DECKER.

#### FOURTEEN CHINAMEN IN ONE SMALL ROOM.

I have heard it said that gas heating stoves consume the oxygen in the air of the room.

While I was in charge of the Equable Gas Co.'s works at San Francisco I was sent up to Chinatown one day to examine the piping in some of the buildings, and on this occasion found fourteen Chinamen sleeping in a closed room less than twelve feet square. I never heard that anything happened to these Celestials, and I believe that anyone will admit that fourteen Chinamen will consume more oxygen than a gas stove. The solution is this: Heated air is lighter than cold air and rises to find its way out over the top of the door or windows or other small exits, and every atom of warm air that leaves the room in this manner is supplied by another atom entering at the door sill or under the windows, and in this manner as much fresh air is entering as is leaving the room.

If your house is steam heated and you place your hand at the window sill when the window is tightly closed, you will be surprised at the amount of cold air entering. The gas stove in the room is the very means of causing fresh air to enter under the doors of the house and enters the room where the gas stove is burning; therefore, unless your room is so tight that no air can enter or leave when the gas stove is burning, no fear need be entertained on account of the consumption of the oxygen in the air of the room.

Try a gas heater in your bath and your office.
